CASINO STRIP™

CASINO STRIP™: a unique laser disc video game that has been in production for over 4 years, and as ward of its high earnings spread, gains in popularity.

Quantum has made improvements to the Casino Strip such as the increase of its library of discs to 12 (9 which feature mostly women and 3 which feature mostly men). The game can be updated on location to a new disc in minutes, giving the game the ability to stay on location for months or even years (quite a unique feature for the video game industry).

After numerous requests, Quantum has added a COUNTERTOP model to the Strip line. Extremely high earnings have shown operators the bar top is quite a desirable spot for this type of game.

All Casino Strips feature:

- Adjustable settings: set the rating of the strip, as well as the difficulty.
- Amusement poker or non-poker program.
- In-house player service & support
- **BEAUTIFUL & EXCITING WOMEN AND MEN IN LIVING COLOR!**
